25,000

steel and concrete tanks serviced

62

years in business

10

service centers
across the U.S.

— WHAT WE DO —

Keep Water Flowing

As the original water tank service company, we offer the industry's broadest range of services, each designed for safety, quality, and compliance.

Water Storage Tank Services

Full suite of tank maintenance services from inspection and cleaning to telecomm management.

Metering & Water Distribution Services

Robust water distribution system maintenance and smart metering installation and monitoring.

Plant Rehabilitation Services

End-to-end inspection and rehabilitation services for concrete plants.

Asset Management

Our asset management approach shifts the risk by assuming full responsibility for lifetime asset maintenance across:

- Steel and Concrete Tanks
- Piping Systems
- Water Quality Technologies
- AMI / Smart Metering
- Plant Rehabilitation

— WHAT MAKES US DIFFERENT —

Stronger Service. Safer Water. Better Communities.

Portfolio Breadth

We offer the industry's broadest range of services, each designed for safety, quality, and compliance. It's paired with high-performance coatings, paints, cleaners, linings, hardware, software, and components. One call. Full service. Quality assured.

Asset Management Approach

We assume responsibility for the performance of your water utility asset. We start with an assessment, design a cost-effective maintenance program, and ensure no potential issue is overlooked. Emergency repairs happen within 48 hours with a lifetime warranty on coatings and repairs.

The USG Water Way

The USG Water Way is how we do business – incorporating safety, quality, oversight, and communication into every project. As an ISO 9001:2015 certified company, we believe that quality work comes from quality people who live and work in the communities where we operate and serve.

USG WATER AT WORK

"We could ill afford a \$110K rehab on our 500K tank, let alone bring it up to OSHA requirements. The ability to spread the cost over a period of time made this a 'no brainer.' The end result as of today; we're HOOKED. I feel the Board will continue this program in ten-year increments forever. It is extremely cost-effective and has the promise of allowing our tanks to last forever."

Jim Hansen | General Manager | Mariana Ranchos County Water District
