

AMI: 21st century technology for small and medium-sized municipalities

Metering systems have become an important tool for the financial stability of water utilities. They can help you increase revenue, reduce non-revenue water and provide excellent customer service. Our Metering Asset Management Program is a customized solution, integrating an Advanced Metering Infrastructure (AMI) system with smart meters into your existing infrastructure for billing and data collection.

Meter Transmitting Unit (MTU)

The water meter reads the consumption and sends the data to the AMI Data Collection Unit on a regular basis.

Data Collection Unit (DCU)

The DCU gathers all the data sent by the meters in its area, organizes it and sends it to the Data Management System.

AMI City Headend

All the data is received and organized in a secured network control computer connected to the City systems for:

-  Water Monitoring
-  Billing
-  Customer Service

**We provide a comprehensive AMI solution.
We install and integrate the AMI network and then provide asset management and long term maintenance over the life of your system.**

Learn more about our **Visio Center** on the back.

Visio Center

Come experience our Visio Center and see how we harness the power of data!

Welcome to the USG Visio Center, a hub where our expert analysts stand as guardians of the Advanced Metering Infrastructure (AMI) world, monitoring AMI systems 365 days a year. At our Command Center located in Atlanta, GA, our metering experts analyze real time data, troubleshoot potential problems as they arise, and issue work orders to the field crews in our Service Centers to manage and maintain your AMI assets; namely smart water meters, transmitters, collectors, host software and billing interfaces over the life of the system.

 Remote Monitoring

 Real Time Monitoring Tools

 Data Management & Communication

 Responsiveness & Traceability

 Logistical Scheduling

 Crisis Analysis & Management

USG Water Solutions would like to extend an invitation to our Atlanta headquarters to witness the dynamic features our Visio Center provides to AMI systems nationwide.

Can't make it? No worries our experts can provide a Lunch and Learn at your facility at no cost to you!
