

Is Your Utility Ready for AMI?

WHAT EVERY METER READ IS TRYING TO TELL YOU

Your metering system is one of the most critical, least visible parts of the distribution network. As aging meters, manual reading processes, and limited system visibility compound, the strain shows:

Without the infrastructure or expertise to make the leap, AMI can feel impossible to even consider.

SEE AMI IN ACTION IN YOUR OWN SYSTEM

USG Water's cellular AMI pilot program gives you concrete data on your system's performance, your path to modernization, and what AMI can deliver before you commit to a single contract.

What's included:

- **Clarity** on installation, operation, and day-to-day management
- **A real look** at OPEX, CAPEX, and revenue opportunities
- **Hands-on experience** with live AMI data and functionality
- **Meter installation** at important locations
- **Real-time results** visible from the online customer portal
- **USG Visio Center Support** with daily monitoring and notifications

IS YOUR UTILITY STUCK IN 2004?

METER READING EVOLUTION

Technology That Evolves—Where Are You?

At USG Water, we provide you with details of where your metering operation is today to determine the appropriate path forward.

The AMI Entry Package

Everything your utility needs to modernize your metering infrastructure — including a customer portal, headend software, dashboards, reporting, and a deployment of cellular-enabled AMI meters.

OUR AMI AND DISTRIBUTION SERVICES:

- ✓ AMI/smart metering installation and monitoring
- ✓ Full asset management
- ✓ Metering and water distribution system maintenance
- ✓ Water quality technologies
- ✓ Piping system services

THE DEMONSTRATION DELIVERS REAL ANSWERS

Stop relying on manual meter readings. Even a small deployment of cellular-enabled AMI meters can reveal powerful insights across your system.

OPERATIONAL CLARITY

See how your system truly performs with real-time meter data, usage visibility, and early leak detection.

FINANCIAL TRANSPARENCY

Understand billing accuracy, revenue recovery opportunities, and the true cost of your current metering operations.

STAKEHOLDER BUY-IN

Give boards and decision-makers the system data they need to confidently evaluate the path to AMI adoption.

HOW THE AMI PROGRAM WORKS

Your water system holds the answers. Our AMI entry program helps you find them by:

- Selecting key locations across your system
- Installing the cellular AMI process
- Collecting metering data over several months
- Creating an online dashboard for real-time visibility
- Delivering a demonstration report to your utility board
- Establishing a clearer baseline for current metering OPEX
- Identifying customer service improvements
- Uncovering billing and revenue gains

WHY CHOOSE USG WATER SOLUTIONS?

USG Water combines expertise, technology, and accountability to keep your water systems safe, efficient, and compliant.

End-to-end utility services

Data-driven asset management

Fast, guaranteed emergency repairs

STOP GUESSING. START KNOWING.

Talk with us to understand your system, reduce risk, and plan your path to AMI.
